

5 OCT 1973

MEMORANDUM FOR: Chief, Real Estate and Construction  
Division, OL

SUBJECT : Study on Utilities Support of  
Environmentally Sensitive Equipment  
in the Headquarters Building

REFERENCE : RE&CD's report dated 5 March 1973  
re: subject

1. The Safety Staff concurs with the intent of the reference, that is, consolidation of computer facilities to the first floor, Headquarters Building. The relocation of such facilities and their concentration in one general area raises certain questions regarding structural separation and related fire protection to protect against total fire loss.

2. If the relocation and consolidation is approved, it is requested that the Safety Staff be consulted during the planning stages to incorporate appropriate safety and fire protection features commensurate with other established safety procedures in the Headquarters Building.

  
Chief, Physical Security Division
